

GEMSTONE REPORT

EDELSTEINBERICHT
RAPPORT DE PIERRE PRÉCIEUSE

No. GRS2019-116916
Date 18th November 2019
Object One faceted gemstone
Identification Natural Emerald

Origin

Gemmological testing revealed characteristics corresponding to those of a natural emerald from:

Colombia

GRS

Weight 2.42 ct
Dimensions 8.11 x 7.70 x 6.37 (mm)
Cut brilliant/faceted
Shape cushion
Color vivid green * (GRS brilliancy-type "vibrant")
Comment CE(O): Minor
* Special comment see appendix

Verification

**Appendix to report No. GRS2019-116916**

GRS Laboratories examined a 2.42 ct natural emerald, described in report number GRS2019-116916, that exhibited very good brilliancy and ideal proportions, making it worthy of receiving the GRS brilliancy designation of “vibrant”.

“Vibrant” is an attribute given to gemstones that display a high amount of color reflection – as opposed to the separately considered category of color saturation. A “vibrant” appearance is achieved through the skillful cutting of a gemstone to its optimal proportions, resulting in greater-than-usual weight loss and a maximized reflection pattern

This vividly saturated emerald of 2.42 ct is reminiscent in hue of the varieties displaying the legendary colors found in the world renowned Muzo mines. They are formally described as “Muzo Green” (*) and commonly known in the trade as “Old Mine” emeralds.

Dr. A. Peretti
Director GRS

This appendix indicates the specific quality and color for emeralds from various Colombian mines; however, it does not specify from which particular mine they were found.
